Question 1

1 / 1 point

Which of the following protocols are supported by secure sockets layer?

- ☐ HTTPS
- ☐ SMTP
- ☐ NNTP
- ☒ All of the Above

▶ [View question 1 feedback](#)

Question 2

1 / 1 point

Which hash method uses a mathematical formula to reduce a message into 160 bits?

- ☐ MD2
- ☐ MD4
- ☐ MD5
- ☒ SHA-1

▶ [View question 2 feedback](#)

Question 3

1 / 1 point

The domain hr.fortuneautos.com is an example of _____.

- ☐ a domain
- ✓ ☒ a child domain
- ☐ a forest
- ☐ none of the above

▶ [View question 3 feedback](#)

Question 4

1 / 1 point

The data encryption standard was broken in which year?

- ☐ 1977
- ✓ ☒ 1997
- ☐ 2007
- ☐ DES has not been broken yet.

▶ [View question 4 feedback](#)

Question 5

1 / 1 point

Which of the following rights does Windows use in an access control list?

- ☐ Full Control

- ☐ Admin
- ☐ Modify
- ☐ Both A and B
- ☒ Both A and C

▶ [View question 5 feedback](#)

▶ [View question 12 feedback](#)

Question 13**1 / 1 point**

With the Cryptographic File System, private keys are stored in an Active Directory.

☐ 1) True☒ 2) False

▶ [View question 13 feedback](#)

Question 14

1 / 1 point

Message Digest 5 hashes & rehashes four times to create digital signature.

- ✓ ☒ 1) True
☐ 2) False

▶ [View question 14 feedback](#)

Question 15

1 / 1 point

Workgroups are a means of grouping computers logically on a network that is not serviced by a Windows domain.

- ✓ ☒ 1) True
☐ 2) False

▶ [View question 15 feedback](#)

Question 16

1 / 1 point

A global catalog must be manually created on the first domain controller.

- ☐ 1) True
✓ ☒ 2) False

▶ [View question 16 feedback](#)

Question 17

1 / 1 point

Session Authentication is used to ensure the accuracy of ongoing communications.

- ✓ ☒ 1) True
☐ 2) False

▶ [View question 17 feedback](#)

Question 18

1 / 1 point

In a forest, none of the trees share a common schema.

- ☐ 1) True
- ✓ ☒ 2) False

▶ [View question 18 feedback](#)

Question 19

1 / 1 point

If a domain controller designated as the PDC emulator fails, it is required that the role be seized by another domain controller.

- ✓ ☒ 1) True
- ☐ 2) False

▶ [View question 19 feedback](#)

Question 20

1 / 1 point

Local groups are security groups that exist on a Windows Active Directory domain.

- ☐ 1) True
- ✓ ☒ 2) False
