Question 1

1 / 1 point

The TCP/IP protocol is the most commonly used transport protocol for remote access.

- ✓ ☒ 1) True
☐ 2) False

Question 2

1 / 1 point

An attacker can modify DNS records to send e-mail to a different SMTP server, which allows the attacker to read all incoming e-mail.

- ✓ ☒ 1) True
☐ 2) False

Question 3

1 / 1 point

In Microsoft Internet Explorer, Restricted Sites Zone is designed so you or the system administrator can specify sites that are considered to be unsafe.

- ✓ ☒ 1) True
☐ 2) False

Question 4

1 / 1 point

The Hypertext Transfer Protocol is considered to be a vital protocol.

- ✓ ☒ 1) True
☐ 2) False

Question 5

1 / 1 point

Remote access can be accomplished through either a dial-up connection or a LAN connection to the Internet.

- ✓ ☐ 1) True
☐ 2) False

Question 6**1 / 1 point**

When a computer sends an e-mail message, the computer looks to a DNS server for the location of the SMTP server.

- ✓ ☐ 1) True
☐ 2) False

Question 7**1 / 1 point**

The Challenge Handshake Authentication Protocol is a type of authentication used by RAS servers.

- ✓ ☐ 1) True
☐ 2) False

Question 8**1 / 1 point**

CSLIP does not use any means of compression for data transfer.

- ☐ 1) True
✓ ☐ 2) False

Question 9**1 / 1 point**

HTTP functions as a request/response protocol.

- ✓ ☐ 1) True
☐ 2) False

Question 10**1 / 1 point**

HTTP operates over TCP port 443.

- ☐ 1) True
✓ ☐ 2) False

Question 11**1 / 1 point**

Which web browser can run on Windows, Linux, and Mac OS X?

- ☐ Mozilla Firefox

- ☐ Opera
- ☐ Google Chrome
- ☒ All of the Above

Question 12**1 / 1 point**

Which statement about CSLIP is not true?

- ☐ CSLIP compresses header information in each packet.
- ☐ The CSLIP header must be decompressed at the receiving end.
- ☐ The smaller header in CSLIP means communication will be faster.
- ☒ It is not possible for an attacker to intercept CSLIP communications.

Question 13**0 / 1 point**

Which of the following authentication types is not available for use in a RAS policy?

- ☐ Challenge Handshake Authentication Protocol
- ☐ Extensible Authentication Protocol
- ☒ Unauthenticated
- ☐ All of the above are available for use in RAS.

Question 14**1 / 1 point**

When creating an e-mail message, which of the following is considered to be a main part?

- ☐ CC:

☒ Subject:

☐ From:

☐ All of the Above

Question 15

1 / 1 point

The Network File System uses remote procedure calls via TCP port _____?

☐ 25

☐ 80

☒ 111

☐ 443

Question 16

1 / 1 point

Which command is used by FTP?

☐ download

☒ get

☐ upload

☐ leave

Question 17

1 / 1 point

Which remote access protocol was originally designed for UNIX environments?

☒ SLIP

- ☐ PPP
- ☐ L2TP
- ☐ PPTP

Question 18**1 / 1 point**

Which connection types are supported by RAS?

- ☐ ISDN
- ☐ DSL
- ☐ Frame Relay
- ☒ All of the Above

Question 19**1 / 1 point**

Which of the following commands is initiated by the Post Office Protocol?

- ☒ stat
- ☐ fetch
- ☐ get
- ☐ select

Question 20**1 / 1 point**

The "web of trust" is used by which e-mail security method?

- ☒ PGP

SMTP

S/MIME

The "web of trust" is not used by any e-mail security methods.
