Question 1   **1 / 1 point**

UDP is used by _____.

○ Network Monitoring Applications

○ NetBIOS Naming Functions

○ DNS Name Resolution

✔○ All of the Above

Question 2   **1 / 1 point**

Which of the following are the main components of a wireless network?

○ a wireless network interface card

○ an access point

○ an antenna

✔○ all of the above

Question 3   **0 / 1 point**

Which of the following ways are used to perform NAT translation?

○ IP Masquerade

✖ ○ Static Translation

○ Load Balancing

➡ ○ All of the Above

○ None of the Above

Question 4   **1 / 1 point**

In most European countries, the 802.11b wireless networking standard uses _____ possible channels.

○ 4

○ 10

○ 11

✔○ 13

Question 5   **1 / 1 point**

Which UDP port is used for SMB file sharing?

○ 21

○ 389

✔○ 445

○ 1433

Question 6   1 / 1 point

Bluetooth operates on the _____ frequency band.

○   900 MHz

✓○   2.4 GHz

○   5 GHz

○   8.6 GHz

Question 7   1 / 1 point

This IP Address class only specifies that communications are multicast.

○   Class A

○   Class B

○   Class C

✓○   Class D

○   Class E

Question 8   1 / 1 point

This wireless networking standard can operate on multiple frequencies and uses multiple antennas to resolve more information.

○   802.11a

○   802.11b

○   802.11g

✓◯   802.11n

Question 9   **1 / 1 point**

This type of packet filtering tracks information about a communication session, such as the ports in use.

◯   stateless

◯   statemore

✓◯   stateful

◯   statemin

Question 10   **1 / 1 point**

This IP Address class is used on small networks.

◯   Class A

◯   Class B

✓◯   Class C

◯   Class D

◯   Class E

Question 11   **1 / 1 point**

A border gateway is a firewall configured with security policies to control traffic permitted to cross a border in either direction.

✓ ◯   1) True

◯   2) False

Question 12   1 / 1 point

Bluetooth supports up to seven devices connected at one time.

✓ ○ 1) True

○ 2) False

Question 13   1 / 1 point

Stateless packet filtering examines every individual packet to decide whether to pass or block a packet.

✓ ○ 1) True

○ 2) False

Question 14   1 / 1 point

The 802.11 wireless standard focuses on the use of the physical and data-link layers of the OSI model.

✓ ○ 1) True

○ 2) False

Question 15   1 / 1 point

Configuring firewall policies to automatically allow all connections helps ensure stronger security.

○ 1) True

✓ ○ 2) False

Question 16   1 / 1 point

A proxy acts as a middleman in network communication.

✓ ○ 1) True

○ 2) False

Question 17   1 / 1 point

Routers can perform packet filtering and are often used as a firewall on a network.

✓ ○ 1) True

○ 2) False

Question 18   1 / 1 point

The reasons for attacker interest in wireless networks mimics the advantages for wireless use.

✓ ○ 1) True

○ 2) False

Question 19   1 / 1 point

TCP/IP is the networking protocol of choice for Windows, Linux, and Mac OS X.

✓ ○ 1) True

○ 2) False

Question 20   1 / 1 point

Infrared wireless networking is susceptible to both radio frequency interference and electomagnetic interference.

○ 1) True

✓ ○ 2) False

Attempt Score: 19 / 20 - 95 %

Overall Grade (highest attempt): 19 / 20 - 95 %

Done
